

## The School Council

We will write a charter for the school playground.

We will introduce a buddy bench to each playground for children to use if they are feeling lonely at playtimes.

We will find out what play equipment children in our school would like to use at playtimes.

## The BLP team

We will establish a BLP certificate to be awarded every week in assembly. This will reward children who have used their Learning Power and promote the use of Learning Power to everyone.

We will organise and run a whole school spelling project. This will encourage children to learn a set of new spellings every week. We will have a large display in the hall, which will show our progress.

## The Sports Crew

We will develop a plan to implement the Road to Rio.

We will ensure that every child has the opportunity to accumulate KMs through organising a run every week. We will reward children on their progress through a reward chart.

We will plan a whole school festival to celebrate our successes. ....throughout the Road to Rio.

## Anti-bullying Ambassadors

We will work to raise awareness of different sorts of bullying through leading assemblies and designing posters.

We will also explain that we should not be 'a bystander' and to speak up about bullying if we witness it.

We also want to make sure everyone in our school know who the Anti-bullying Ambassadors are in their class and across the school.

## Our School Improvement Plan

We will try to make sure everyone in our school knows about the Charter for Children.

We will speak at a School Governors meeting to make sure our Governors also know about the Charter.

We will campaign on a global issue.

We will raise money for charity to support children both in the UK and in other countries.

## Eco Council

We will be working towards achieving our bronze Eco flag. We will write our own action plan after we have investigated how our school uses resources like energy and water.

We will also be repeating the Bird Watch we carried out in January so we can compare the number of birds seen in different seasons in our school grounds. We hope to make some proposals to our school Governors about how we can improve our school grounds to attract more wildlife.

## Rights Respecting Group
